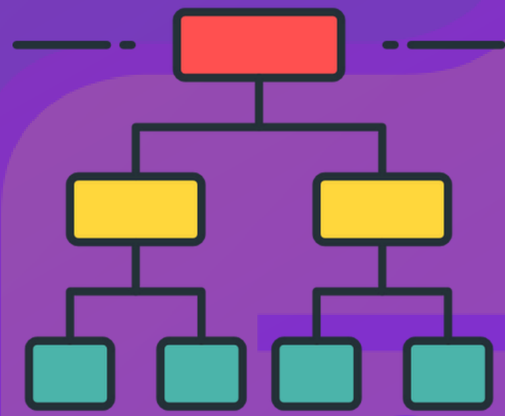
DATA STRUCTURE

A data structure represents a specialized format for organizing, processing, retrieving and storing data.



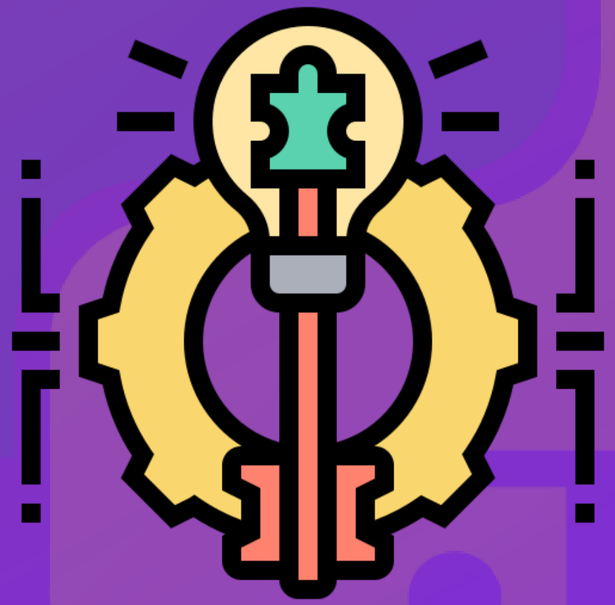
LISTS IN PYTHON

Python Programming

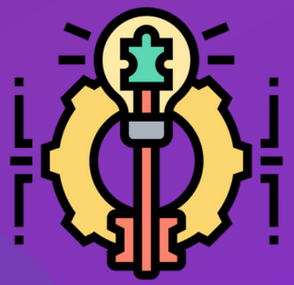
WHAT IS A LIST?

A Python list is an ordered collection of items, which can include almost anything.

LIST COMPREHENSION

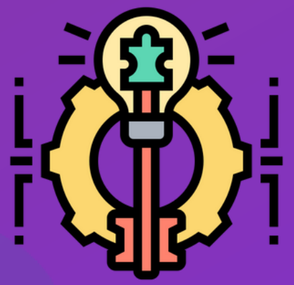


LIST COMPREHENSION



It’s the “Pythonic” way of constructing a list.

LIST COMPREHENSION



List comprehension offers us a shorter and more concise syntax to create a new list based on the values of an existing iterable.
